SKILLS

Programming languages: PHP, Python, JavaScript

Framework: Laravel, FastApi, ReactJs, jQuery

Testing Framework: PHPUnit

Databases: MySQL, MongoDB

Microservices: Redis, RabbitMQ, Apache Kafka, Elasticsearch

DevOps: Docker, Github Action, Kubernetes, K3s

Version control: GitHub, GitLab, Bitbucket

Cloud: AWS (S3, EC2, RDS, VPC), Wasabi

Gen AI: LangChain, LangGraph, ChromaDB, Ollama, Scikit-learn

PROFESSIONAL EXPERIENCE

Software Engineer, WebMD

Mumbai, Maharashtra

Oct 2025–Present

- **Managed Medical Panels**, added new features, and worked on access rights.
- Worked on campaigning projects, **managed various backend services**, and developed multiple similar APIs related to these projects.
- **Collaborated with Agentic AI** to revamp and review the codebase and integrated APIs for medical document reviews.
- Worked on **Kubernetes-based microservices architecture** with CI/CD pipelines, following **TDD** (Test-Driven Development) practices to automate testing and improve deployment confidence

Software Developer – Backend, Pay1

Mumbai, India

May 2024–Oct 2025

- **Led the Scratch product of Recharge Payment**, handled a large request flow, and ensured the smooth integration of new features and requirements.
- **Refactored the whole backend architecture** for recharge, utility, and bill payment.
- Optimized load time by 20% using **query optimization**, **cache management**, and implemented design patterns to optimize code and maintainability.
- Worked on Linux server, Redis queue, and **integrated third-party bill payment API**.

Software Developer – Backend, BDM Infotech

Mumbai, Maharashtra

Jan 2024–Feb 2024

- **Led SaaS application projects**, Laravel Filament for a scalable and performant admin panel.
- Implemented design patterns for improved maintainability and performance.

Software Developer – Backend, iThink Logistics

Mumbai, Maharashtra

Jul 2021–Dec 2023

- **Contributed to diverse projects**, including Onboarding System, New Logistics Integration, and Push Notifications for web applications.
- **Implemented RabbitMQ from scratch**, efficiently resolving fulfillment issues to increase customer retention by 30% and **maintained Elasticsearch panels** for client issue resolution and ticket searches.
- Successfully managed Redis, **addressed duplicate data concerns** and handled cloud storage solutions; implemented Wasabi to cut costs 80% less than AWS S3.
- **Revamped old modules**, acquired new skills and testing techniques, and gained a profound understanding of software architecture and the importance of collaboration within development teams.

RESEARCH & DEVELOPMENT

Project Name: Blog Generation

Description: Developed an AI-powered system that generates blogs based on **user-selected topics using LLMs with structured prompt workflows**.

GitHub: <https://github.com/Suraj127-git/genai-blog-generation.git>

Tech Stack: Python, FastAPI, MongoDB, Reactjs, LangChain, LangGraph, ChromaDB, GroqAI, Docker, Github Actions, K3s.

Project Name: Medical ChatBot

Description: Developed an AI-powered medical chatbot supporting **tool calling, context-aware conversations, and multi-step reasoning workflows** to provide structured responses to user health-related queries.

GitHub: <https://github.com/Suraj127-git/genai-chat-bot.git>

Tech Stack: Python, FastAPI, MongoDB, Reactjs, LangChain, LangGraph, ChromaDB, GroqAI, Docker, Github Actions, K3s.

Project Name: NoteBookLLM

Description: Developed a **Retrieval-Augmented Generation (RAG)** based document assistant enabling document ingestion, **vector search, context-aware Q&A, multi-step reasoning, and tool calling** to generate responses grounded in uploaded knowledge sources.

GitHub: <https://github.com/Suraj127-git/laravel-notebook-llm>

Tech Stack: PHP, Laravel (AI - Reverb), Pgvector, Reactjs, GroqAI, Docker, Github Actions, K3s.

EDUCATION

Bachelor of Science in Information Technology

University of Mumbai, Maharashtra, India

May 2021
